- **Evgeni Glushko:** Create video demonstration and arrange follow-up
 - רן עטיה to film a system tour; Evgeni Glushko to arrange a follow-up session. [Create Ticket](#)

Key Decisions:

- **Development of a new educational platform:**
 - The team agreed to create a web application as an educational platform for teachers and students, with features like search functionality, personal profiles, lesson uploads, and feedback systems.
- **Pilot launch targeting specific user group:**
 - The decision was made to initially target the platform as a pilot to about 500 users from the student community before a wider rollout.
- **Incorporation of feedback and rating system:**

- The platform will include a feedback mechanism allowing users to rate and comment on the educational content, enhancing the collaborative aspect of the tool.

Blockers:

- **may nigri:** Exam Period Quiet Time
 - Team availability is reduced for 1-1.5 months from late March due to exams.
- **רון עטיה:** Decision on Application Type and Concern about double work
 - A decision is needed on the platform type, with a preference for a web over a mobile app, and concerns about double work and project focus.
- **רון עטיה:** Lack of experience to show the system and Uncertainty about initial user engagement
 - Inexperience in demonstrating the system may affect vision sharing, with uncertainty on initial user engagement given the July deadline during vacation.
